

# Identity Verification

AccuSourceHR™ Workforce Solutions' IdentitySource™ is a cutting-edge ID verification solution designed to authenticate an individual's identity quickly and securely from any web-enabled device. Leveraging advanced biometric technology and OCR text extraction, IdentitySource™ analyzes identification document authenticity and live and static facial match to ensure applicants "are who they say they are."

AccuSourceHR™

IdentitySource™

## Key Features

**Dependable results available in minutes**

**Multiple data points result in spoof resistant process**

**Provides identity verification by comparison of biometric data against valid ID source**

## Why AccuSourceHR™?

**Expert Compliance Support**

**Award Winning Client Care**

**PBSA Accredited**

## A Solution for Remote Workers, Mobile Staff & More

With a focus on accuracy, efficiency, and security, IdentitySource™ delivers a comprehensive Identity verification process minimizing the risk of proxy, "bait-and-switch", or fake interviews. With an ever-increasing number of interview and skills testing functions conducted in a remote environment, underqualified and unqualified job seekers are often gaining an advantage by utilizing proxy interviewees to successfully secure job offers for positions they lack the skill set and knowledge to adequately support. Through innovative use of AI, IdentitySource™ utilizes video facial recognition, ID document validation, and age progression technology to validate job candidates' true identity aiding in risk mitigation and ensuring the applicant present in interviewing is the employee starting their new position with your organization.
