

# Checkr

Optimize your candidate pool.  
Win more talent.

## Background checks that move you forward

In today's competitive hiring environment, finding and converting the right talent is more challenging than ever. HR teams now have to keep up with changing candidate expectations and evolving compliance requirements, all while enabling their teams with the right tools and technology.

Checkr was born out of the demands of gig economy innovators who needed modern background check technology to fuel their growth. By reimagining the background check using artificial intelligence and machine learning, Checkr makes it easy for companies to deliver radical business results.

# Achieve unparalleled results with Checkr

## Improve Candidate Experience and Conversion

Our US-based candidate support team, easy-to-use mobile interface, and real-time ETAs work together to promote transparency throughout the candidate journey and increase candidate conversion.

## Optimize Your Candidate Pool

With Checkr, you can adjust your adjudication criteria on an ongoing basis to reduce bias across the funnel and get access to a wealth of analytics to understand the decisions you're making.

## Increase Productivity and Process Efficiency

Checkr leverages Artificial Intelligence and Machine Learning to automate manual processes that slow down hiring, so your team can spend less time reviewing reports and more time focused on strategic activities.

## Differentiate Your Employer Brand

From new features that increase trust and safety to a product that scales with you, Checkr is always innovating to ensure you deliver the best possible experience for your candidates.

## Mitigate Risk and Maintain Compliance

Checkr's team of compliance experts continuously monitors and programmatically applies all relevant laws and regulations to ensure you're always making fair and consistent decisions.

## How we transform the way you hire

### Auto Disclosure & Authorization

Put the right legal notices in front of candidates based on their location and the job's location, to comply with local, state, and federal laws.

### Seamless Integrations

Our publicly-available API helps you connect Checkr with your existing HR systems to make onboarding quick and easy.

### Adverse Action

Automatically send all required notices when you choose not to engage with a candidate, including recent individualized assessment laws in Los Angeles and New York City.

### Automated Adjudication

Fill roles faster while maintaining compliance. Identify up front which infractions matter for each job and ignore irrelevant history.

### Compliance Engine

Only show the data your team is legally allowed to see, based on local, state and federal laws. Automatically hide charges that are legally unreportable.
