

go it

</concept>

</ignite your projects>

WELCOME

From an old dream to a giving back mindset.

GO IT Concept comes from an old dream of back to simple things in life, beginners mind and the gratitude of giving back

We are based in the city of Seia, the doorway to Serra da Estrela, the highest point of Portugal.

Seia is located in the inland of Portugal, the richest location for greater work-life integration, uncrowded place, back-to-nature approach and fabulous place to produce and deliver technology around the world.

Our facilities are in a small village called Lapa dos Dinheiros. We are nearby the magnificent fluvial beach of Lapa dos Dinheiros and surrounded of beautiful and intact forests and pure nature at almost 1000m of altitude.

Yes, we deliver Technology from here!

What does GO IT embodies?

it embodies the idea of how technology based in Serra da Estrela, will be the driving force to **ignite tech talent attraction**, higher retention rates, **reduced turnover**, **agility and quality of code delivery**.

it embodies the **idea of diversity and inclusion** - we recruit from all over the world, whatever the culture, race, ethnicity, sex, orientation or gender - **the new paradigm of talenship;**

it embodies the idea of **multiculturalism emebed in local traditions** and experiences of the mountain people; the idea of new people contributing to reduce the desertification of the region and **promoting equality of oportunities;**

It embodies the idea of locating the company in **a innerland geography, uncrowded city** to implement technology-based companies, **with quality of life, emotional mental and material;** an **intangible journey for all:** clients, partners and employees

A new company, a new concept!

</Mission>

We help customers **create extensions** of their engineering teams **gathering the necessary technological talent to delivery quality of service, clean code and leverage talent inside the the company.**

GO IT Concept
resonates a new
intangible
consciousness,
challenging the
industry of
technology and the
future of work
around the world and
thus result in integral
satisfaction for
customers and
employees at a
material, mental and
emotional level.

</go for it!>

A new company, a new concept!

</Vision>

We put tech talented teams at the heart of the business, **building cultures that are affirming and inclusive.**

Hiring around the world, gathering multicultural and diverse talented engineers.

[Go-it.pt](http://go-it.pt)

We believe that customer has moved from a purely material consciousness to an intangible one, where the emotional and the act of buying has a purpose or emotional and intrinsic goals.

</go for it!>

A new company, a new concept!

</Services>

We operate as an outsourcing model building tech external teams, though fully mingled to quickly ignite your teams. We made it easy with two main services.

</NEARSHORE </EXTENDED TEAMS>

Local: Fully remote from their cities or based in Seia Headquarters

Management: Line Manager/Tech Leader from GO IT

</ON-SITE </OUTSOURCING>

Local: Customer Facilities

Management: Team leader from Client Side

</go for it!>
