

REPORT GRADING

Although our reports are easy to read as is, it can often require time and attention to review results on reports that contain many searches and or many results.

Report Grading allows for the simple reviewing of results based on the criteria outlined by the client.

- One can simply look at the top of a report and determine if the applicant is acceptable to hire, or if additional reviewing of the information will be required prior to a hiring decision.
- Allows the client to choose what type of compliant grade PeopleG2 places at the top of the report to speed up the decision-making process.
