

Drug Testing Solutions from JDP

Are Your Applicants Full of Substance — or Just Using Them?

Blaze through the screening process with JDP’s fast and convenient drug testing services. We’ll help you figure out who might not be in the best state of mind to safely and effectively do their jobs, so you can avoid accidents, bad behaviors and poor performance. And thanks to online test ordering, online results and proactive service, you’ll know quickly if your candidate’s opportunity is about to go up in smoke.

Say Goodbye to Drug Testing Headaches

We’ve made the drug testing process simple and seamless for both employers and candidates.

SINGLE SIGN-ON PLATFORM

Access all your health and background screening services in one place

1000s OF TESTING LOCATIONS

Our national lab network includes thousands of clinics and collection sites, so your candidates and employees never have to travel far for testing

ONLINE RESULTS

See test results online the moment they’re ready

PROACTIVE SERVICE

We proactively get test results instead of waiting for labs to send them to us, so you get results faster

EASY, ACCURATE BILLING

Receive a single bill at the end of each month for all of your applicants

AUDIT-FRIENDLY DOCUMENTATION

Get PDFs of your applicants’ screening results that you can use to streamline the auditing process

Our Lab Network

JDP's Drug Testing Services

With a variety of drug tests to choose from, we'll make it easy to learn if your applicants or employees are using substances that could put them — or you — in harm's way. Popular drug testing services offered by JDP include:

Lab-Based Urine Drug Screen (In and Out of Network Options)

Includes collection, lab and MRO services along with online scheduling. Testing is performed at SAMHSA certified labs. JDP offers a variety of drug panels (5 to 10 drug panels and custom panels) and cutoff levels in addition to the federal mandated SAMSHA/ DOT 5-drug panel. Custom panel requests are built and implemented within 48 hours. Both in and out of network drug screening options require a site match to determine availability.

Lab-Based Hair Follicle Drug Screen

Includes collection, lab and MRO services. Hair testing analyzes for drugs within the hair shaft, rather than bodily fluids like urine or saliva, to determine whether drugs of abuse are present. Compared to analysis of bodily fluids, hair testing is highly resistant to evasion by adulterating or substituting samples, or by simply abstaining from drug use for a few days.

Instant Testing Drug Screens

JDP offers a variety of instant drug screenings with self-collect urine or saliva testing. Many different panels and products are available.

Self-Collection Lab-Based Testing Drug Screen

JDP offers a variety of self-collection drug screening devices with either self-collect urine or saliva to be sent to a lab by the client. Kits include the collection device and shipping supplies to send the sample to the appropriate lab. Many different panels and products are available.

Breath Alcohol Testing

Clinic-administered breath test for alcohol. Provides specific level of alcohol present.
